

MetricsCube Business Analytics For WHMCS

Activation Guide

MetricsCube Business Analytics is included free of charge with every ModulesGarden WHMCS module.

The addon is delivered together with your main module, so no separate installation is required. Once your primary module is installed, MetricsCube Connector will automatically appear in the **Addon Modules** section of your WHMCS. You only need to activate it.

After activation, MetricsCube adds a **compact widget** to your WHMCS admin area, providing a quick overview of useful business data and customer-related metrics directly within your panel.

If you would like to explore more advanced analytics features, you can connect your WHMCS to the external MetricsCube platform at any time.

Activation Steps

Click **Activate Now** in the popup notification, or find **MetricsCube Connector** on the list of addon modules and click **Activate**.

That's it! The MetricsCube widget will immediately be available across multiple sections of your WHMCS admin area.

×

Would you like to activate your FREE MetricsCube module?

The handy MetricsCube addon for WHMCS gives you a **free dashboard widget** revealing practical hints about your business performance and a smart customer overview that saves you time every day.

Instantly boost your WHMCS experience with real-time insights and smoother workflows!
